

Starview increases in-house capabilities to include system automation and integration.

Starview recently completed the above machine for one of our European Pharmaceutical customers. It is a flexible machine designed to produce wallet packs. The primary component of the system is a FAB/PH6-1824 automatic rotary heat sealing machine. The rotary machine feeds the cards and the capsule packages. There are options to fold the cards by hand or with the automatic folder. The press is designed for either heat seal or for the Ecobliss patented cold seal.

The unloader then hands off the sealed package to a robot. The robot selects whether the package gets folded further in the inline folding mechanism or simply released down a chute to exit the system. Feel free to visit the new System Automation and Integration section of our website to see a video of this machine in operation.

Starview now offers:

- Machine internal automation features such as card folding
- Ink Jet and laser card coding within or external to the machine
- Automated product loading using robotics
- Bar code verification
- Vision systems for product and package verification
- Automatic stations for removing rejected packages from the production stream
- Robotic handling of finished packages

Please contact a member of our sales team to discuss your client's specific needs with regard to automation and integration. Look to Starview for innovative solutions to your packaging needs.

Visit with Starview at an upcoming trade show

MD&M[®]

EAST

Booth 1909

Starview will be exhibiting for our second year at MD&M East. The show runs from June 14th through June 16th 2016 and is located at the Jacob K. Javits Convention Center, New York, NY. This show is co-located with EastPack 2016. If you are attending the exhibition, make certain you visit with us.

We will be displaying and demonstrating:

- Starview's **NEW MS/PH1-1418 shuttle for medical device packaging**. This machine includes the optional servo-driven automatic shuttle tray.
- An **ERB/PH4-1418 semi-automatic medical device packaging machine** with a finished package unloader and conveyor system. We will be running a medical device package produced from PETG with a Tyvek lidding material.
- A Model **MR/PH2-1825 manual rotary medical device packaging machine**. This particular model is capable of running up to 6" deep tubs generally used for kitting. We plan to run a HIPS tub with a Tyvek lid.
- A **FAB4-1012 four-station automatic blister packaging machine** will be demonstrated at the **Rohrer Corporation Booth #2933** in the EastPack Show section of the hall. Please visit the Rohrer booth to see the FAB4-1012 producing the latest styles of blister packages.

Starview Packaging Machinery, Inc.

Leading the industry

With innovative packaging machine designs for:

**Blister & Clamshell Sealing • Medical / Pharmaceutical Packaging • Skin Packaging and Die Cutting
Food Tray Packaging • Thermoforming / Vacuum Forming • Customized Packaging Equipment
